Alcohol content:	13,5 Vol %
Yearly production:	200 bottles
Type of bottle:	Prestige, 500 ml

# CLOS DE TRIAS

The wine-grower: Even Bakke

Born in Colorado, raised in the USA and Norway, Even Andreas Bakke has taken part in and run 14 vintages of winemaking in California in vineyards such as Matanzas Creek and Landmark until 2007 when, after a 3-year search, he has started his own winery in the south of France, in Provence. While in California, during his studies of technical craft necessary to winemaking, he has come to the conviction that good wine needs no technology. Even purely follows his penchant to experimentation, his intuition and his know-how.

## The estate: CLOS DE TRIAS

On the foothills of Mt. Ventoux, known to determined cyclists and fans of the Tour de France competition, lie the 20 hectares of the winery with its share very old vines, +80 year-old, at 300-500 meters above sea level growing in Triassic soil. The vineyard has been conventionally exploited by local wine-growers until its takeover by Even A. Bakke in 2007. The organic conversion completed in 2012 and the winery certified with the European Organic label EG Öko-Verordnung 834/2007.

FR-BIO-01  
Agriculture France

The grapes are hand picked and hand-sorted afterwards using a dedicated sorting-table. The picking is done exclusively in the morning and ferments will often be whole-cluster to add the complexity of the stems.

In a short time, the Clos de Trias winery has become one of the best wineries in the Southern Rhône region.
